

MAGA Update 03

Well, I just watched the President's address to Congress. It was the most partisan speech any president has ever made. He maligned the democrats many times as he praised the crazy dismantling of the government by Elon Musk.

"America Is For \$ale" now to the highest bidders, and we're witnessing the "Melting of Democracy" on a daily basis.

Trump has all but abandoned Ukraine, and is now taking Putin's side of this three year old war.

He's also backing out of our commitments to NATO. Which is making Russia extremely happy. They don't have to spout their propaganda anymore, Trump's doing it for them.

His "America First" agenda is making us the laughing stock of the world and putting us last on everyones list of intelligence sharing.

We are becoming the next dictatorship on the world stage as he turns his back on our neighbors and friends.

Is this what you voted for? I don't think so!
